Excellent job

Welcoming atmosphere, nice repetition and feedback. Good to learn that you can already learn a lot from a rough outline instead of from a polished pitch. Helped me very much for my upcoming pitch!

maybe we should prepare one version before this workshop

Would have preferred for little clusters (TU, Utr, Eindhoven) & in-person. It lends itself better, and it's closer to the actual setting you'll be presenting in.

The handouts, especially the diamond structure, is very unclear if you haven't attended the workshop, or maybe if no notes are attached to it, then it would be hard to intepret it after some time has passed from the workshop

The pair breakout sessions felt like there was too much time, but the group breakouts at the beginning and end felt like too little time
