The workshop was very interactive and insightful

I enjoyed the workshop, especially how encouraging both Jet and Paulien were to all the participants.

well organized workshop, especially the breakout rooms for practice. The chance of improve and present again was nice

I like the possibility of practicing the pitch several times and receiving multiple feedback.

The interactive session in the breakout room were really useful and smooth.

I liked hearing other researcher pitch their work

I liked the structure, but a tiny bit more practice and less theory would be even better for me.

Very nice way of practicing your pitch and getting some usefull tips. Thank you for the nice session!

Some of these theories were already known by me but I like the practice oriented session around it and learned a lot from it. For the 3 hours it is nice and the time flew by and would almost want it like 30 minutes longer to give slightly more time for some feedback elements
