

# Organisation

The project was run by combined project leadership of both Delft University of Technology and Eindhoven University of Technology. The project team consisted of:

- Annoesjka Cabo (TUD) - Project leader
- Hans Cuypers (TUE) - Project leader
- Caroline de Wit (TUD) - Coordinator and community manager
- Julie Beardsell (TUD) - Innovation expert, focus on technology
- Martijn Ouwehand (TUD) - Open and Online Education expert
- Bart van den Dries (TUD) - Math content expert

The project was commissioned by the Association of Cooperating Dutch Universities (VSNU). Given the strong relationship with the ongoing 4TU Blended Learning project, and the overlapping context of the Open Up Math project, the project team answered to the 4TU.Applied Mathematics Institute (4TU.AMI) board. Synergy among both projects was created by involving two members of the Open Up Math Project (Hans Cuypers and Caroline de Wit) in the Blended Learning Project.

The Open Up Math project team itself came together at least every four weeks and in bilateral meetings where necessary. In addition to the regular meetings, there were meetings with the Ministry of Education and Mathematics lecturers from four universities.

All documentation of the project will remain available: <https://www.surfdrive.nl/>. Additionally, information of the project could be found on: <https://www.4tu.nl/ami/en/Education/Open-Up-Math/>
