

AMSTERDAM INSTITUTE FOR  
ADVANCED METROPOLITAN SOLUTIONS

# Engineering the future city.

Leendert Verhoef  
Program Lead Living Labs

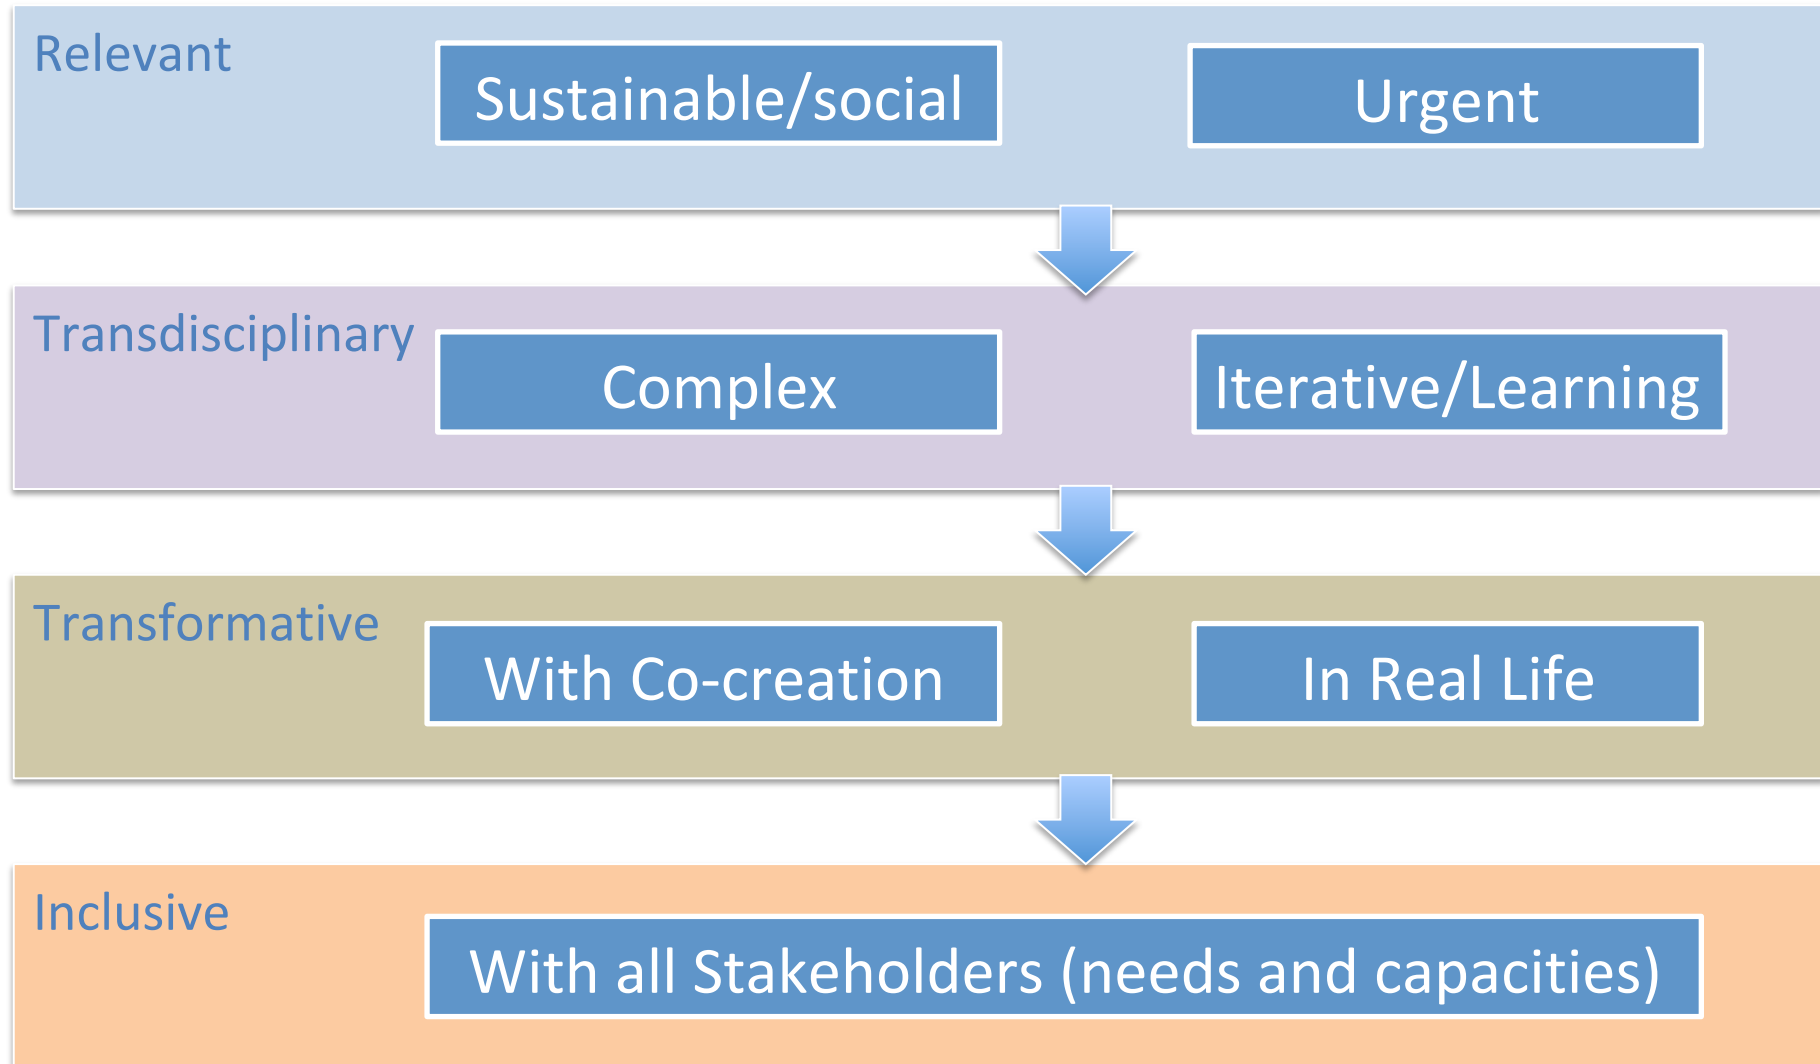

AMS Institute is a young and ambitious scientific institute located in Amsterdam. In this institute science, education, government, business partners and social organizations are working tightly together to create solutions for the complex challenges a metropole like Amsterdam is facing. Now and in the future.

## LIVING LABS PROGRAM AT AMS - WHERE TO START?

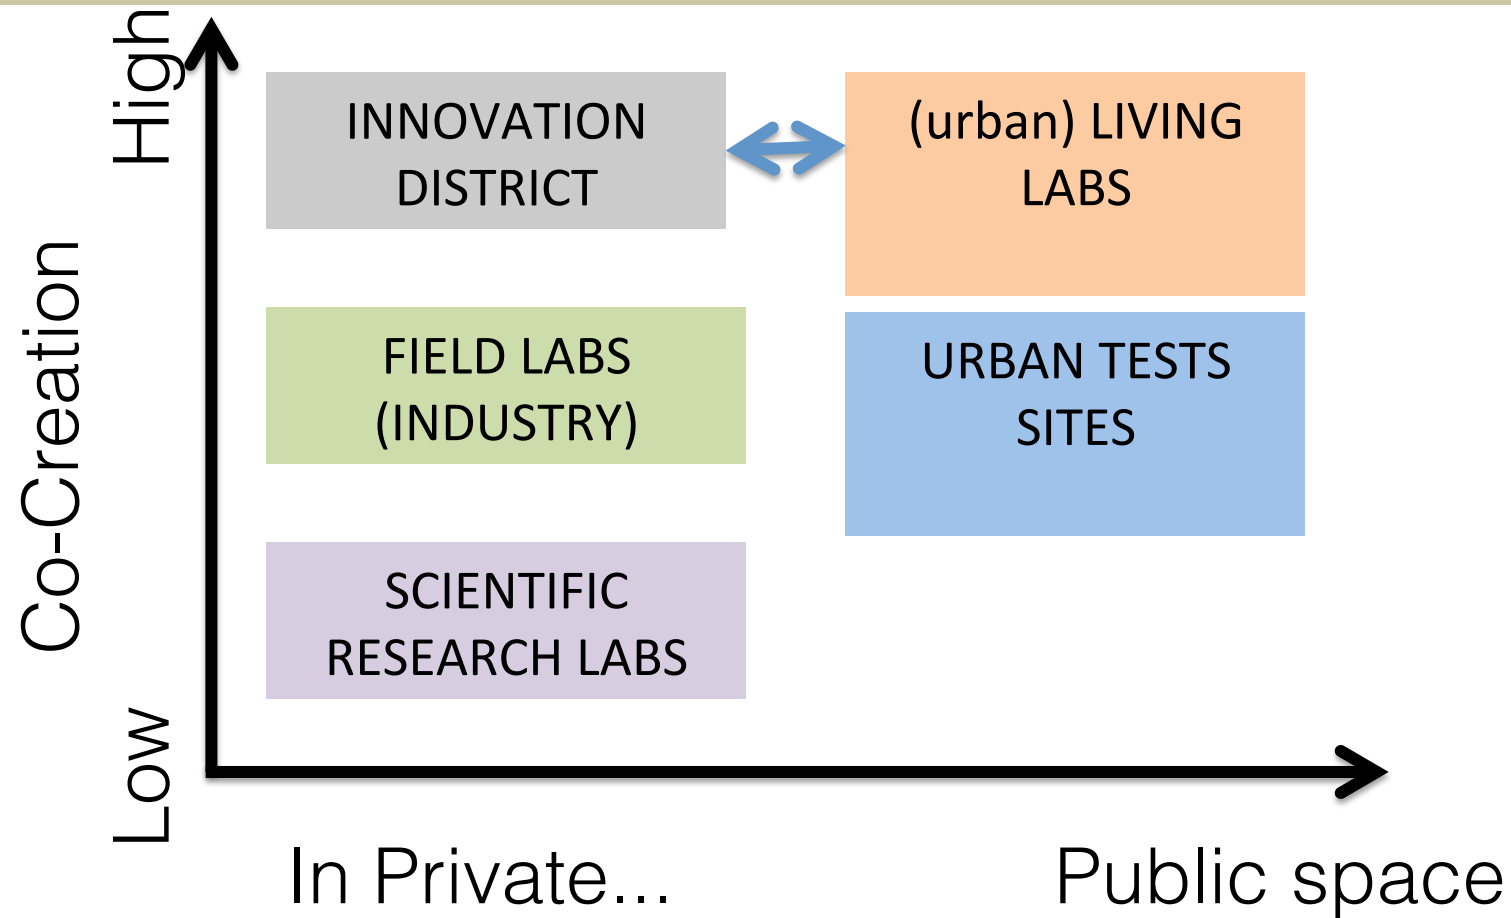

## TACKLING METROPOLITAN PROBLEMS

Urgent, social, complex challenges can best be solved iteratively with stakeholders

## WHAT IS A LIVING LAB?

A space in which real-life experimentation takes place with a diverse participant group in co-creative modes

## TWO WORLDS: PROJECTS VS LEARNING

# THE AMS URBAN LIVING LAB WAY OF WORKING

Connecting the world of projects (experiments) with the approach of co-creation, operationalising inclusiveness, changed attitude, and a learning/iteration approach

## TOOLBOX (UNDER CONSTRUCTION)

For the various phases, a set tools is under development as well as criteria which to use when

<b>Owner/Curator Phase</b>	<b>AMS</b>	<b>Partners</b>
<b>Design / Process / Vision</b>	The Canvas Geographical mapping	Living Roadmaps (Amsterdam) The Adventure Wheel (MIT)
<b>Stakeholder involvement (trust building)</b>	The GAME	HHS Lego serious Play (HU) Go2Zero game (TUD)
<b>Inclusion / Citizen involvement</b>	Citizen Engagement	Citizen Sensing (WAAG)

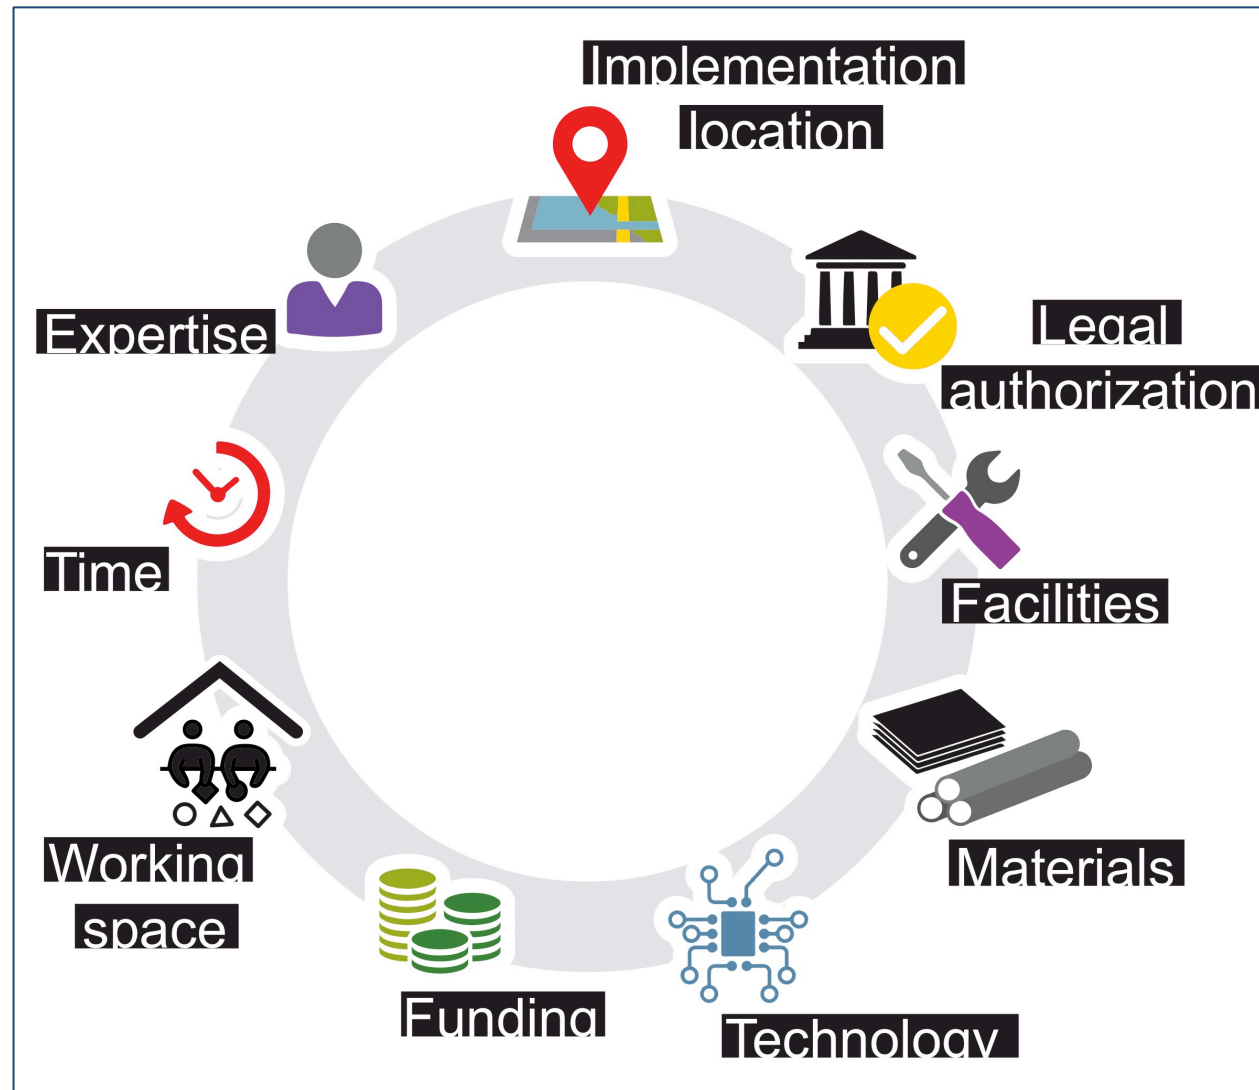

## TOOLS: URBAN LIVING LAB CANVAS 1.4

The Canvas will guide towards a shared vision and a go/nogo decision on a living lab

<b>0. General</b>		<b>1. Identification</b> <i>Check: this is complex, multidisciplinary problem</i>	
<b>2. Partners &amp; Outcomes</b> <i>Check: All partners are committed and together allocate development resources until Go</i>	<b>3. Projects / experiments / the case</b> <i>Check: real experiments / projects are identified and used to make sure this lab is valuable / feasible</i>	<b>4. Location</b> <i>Check: a clearly delineated physical space belonging / under influence of one of the partners</i>	<b>5. Shared Vision</b> <i>Check: This is our shared vision</i>
<b>7. Participants &amp; Outcomes</b> <i>Check: All who are needed are onboard ; all understand outcomes for the others ; all accept conflicts of interest</i>		<b>8. Organisation and Roles/responsibilities</b> <b>9. Resources</b> <i>Check: we agree on all roles and on organisation</i>	
<b>11. Impact &amp; Replication</b>		<b>12. Review and Evaluation</b>	
<b>13. Internal learning</b>		<b>Final Check:</b> <i>it is a multi-disciplinary, co-creative, co-productive, real-life approach leading to outcomes and impacts on urgent societal problems and Living Lab approach is beneficial</i>	

## TOOLS: PRACTICAL CONDITIONS

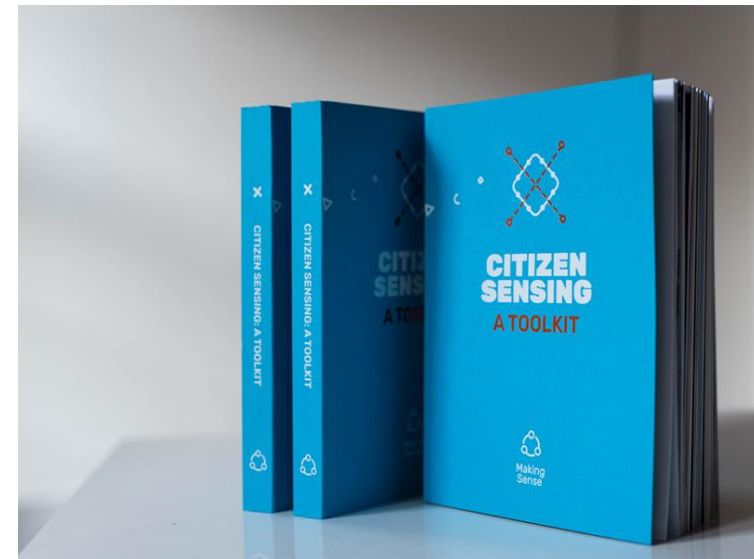

# TOOLS: CITIZEN ENGAGEMENT

## AMS way of working

### Principles for citizen engagement

## Living Roadmap

### Van waar jij staat, naar jouw volgende stap

Doordat we op verschillende manieren meten waar de gebruiker staat, kunnen we een zo relevant mogelijke volgende stap voorstellen. De combinatie geeft ons zowel inzicht in lange als korte termijn behoefte.

## MARINETERREIN AS LIVING LAB (COMMUNITY)

## WHAT ARE TERMS OF SUCCESS FOR LIVING LABS?

- A relevant challenge:
  - Complex, urgent, multidisciplinary, multi stakeholder challenge
- (Empowering the) process :
  - Methodological Rigor and Flexibility, Layered approach ...
  - Connect conventional (project) with new (process)
  - Use (our) tools (...wisely)
- Partners:
  - Connecting diversity of stakeholders
  - Appraising needs and capacities of all...
  - Enable / reward / retain citizens (=non professionals)
- Result:
  - From outcome to impact
  - Replication of process *and* product...
- Time, time, time ...
