

2016-CYBERSM-1B: CYBERSECURITY MANAGEMENT 3TU

- **Context:** Information security in a mature organization is a complex matter. Knowledge of common models and standards for managing Info Security is key.

- **Learning objectives:**

1. To inform you on the state-of-the-practice and state-of-the-art in Info Security models and standards.
2. To enable you to:
 - Map risk appetite to control objectives;
 - Control and guidance documentation;
 - Assess the compliance against control objectives.
3. To be able to do basic security assessments, given your increased understanding of leading standards, common risks and controls in information security.
