E-LAW

Dr. Lesley C.P. Broos LL.M.

E-LAW: INTRODUCTION

- E-law is about legal challenges in response to the (ab)use of ICTs
 - Protection of Intellectual Property (IP) in an online environment
 - Cybercrime
 - E-commerce contracts / consumer protection
 - Digital signatures
 - Cross (legal) border interaction / jurisdiction
 - Electronic processing of personal data
 - Domain name disputes
 - E-governance
 - Telecom law
 - Robot law
 - Techno-regulation
 - Web Accessibility for people with disabilities
 - ...

E-LAW: INTRODUCTION

- The (ab)use of ICTs challenges fundamental rights and principles like
 - Legitimacy
 - *Code is law?*
 - Legal certainty
 - *Applying copyright law (NL: 1912) on software?*
 - Privacy protection
 - *Any privacy online?*
 - Legal protection of consumers
 - *Who's responsible for online banking fraud?*
 - Equality
 - *Accessibility online income tax filing for older people?*
 - ...

Learning goals

Aim:

To provide an overview of the Law, more specifically to be able to:

- distinguish legal issues from ethical, political and technical issues
- read relevant legal documents (regulations, directives, case law)
- discuss legal issues with lawyers

Learning outcomes

- A basic understanding of the key legal frameworks that are applicable on the internet in relation to cybersecurity, data protection and privacy, and fundamental rights
- An appreciation of the complexity of legal and regulatory issues in a global, borderless network such as the internet
- Skills necessary to understand and communicate with legal experts in relation to cybersecurity law
