

# Ethics and Resilience

*dr. Samantha Copeland*

*TU Delft – Ethics & Philosophy of Technology*

## Why Ethics?

When designing resilient systems or environments, we have to think about questions related to justice, care, exploitation....

If a resilient city is our ideal, what does that mean for the people who live there?

# Knowledge and Social Capital

Who has the knowledge we need, to prepare, to endure, to recover?

Social capital is key to resilience.

I look at knowledge as social capital, and at how we produce, share and put knowledge to use through the lens of ethics and epistemology:

Inclusion is good for knowledge, for communities, and for resilience.

## Knowledge and Social Capital

- *Resilience for whom?*
- *Resilience of what?*

*What is an (epistemic) community?*

Thank you for your attention!
